### Extractable Highlights in rM 3.x (self:RemarkableTablet)

submitted 4 hours ago by drpeppe

With rM forcing an update to continue using Connect, I need to update my workflow, which currently includes using RCU to download highlighted PDFs. (I then use a separate service, Sumnotes, to extract the highlights.) I had been sticking with 2.x in order to preserve this system. **It's crucial to my work as a manuscript editor.**

For 3.x, I've read in other posts and in the RCU manual that PDFs will need to be uploaded to the tablet in Remarkable's native aspect ratio (3:4) in order to be exportable with highlights later. (Last comment in this post: [https://www.reddit.com/r/RemarkableTablet/comments/194blmh/extract\\_highlighted\\_words/](https://www.reddit.com/r/RemarkableTablet/comments/194blmh/extract_highlighted_words/))

**Does anyone do this already: ratio, upload to tablet, highlight, export? Care to share a PDF that you've uploaded in 3:4 aspect ratio and then highlighted in the current (3.x) version of rM? I'd like to test whether my workflow will work (so long as I add this prior step of converting to 3:4 first.)**

**(I realize this is convoluted—if you have a simpler solution on offer, I'm ALL EARS.)**
